8 947 €

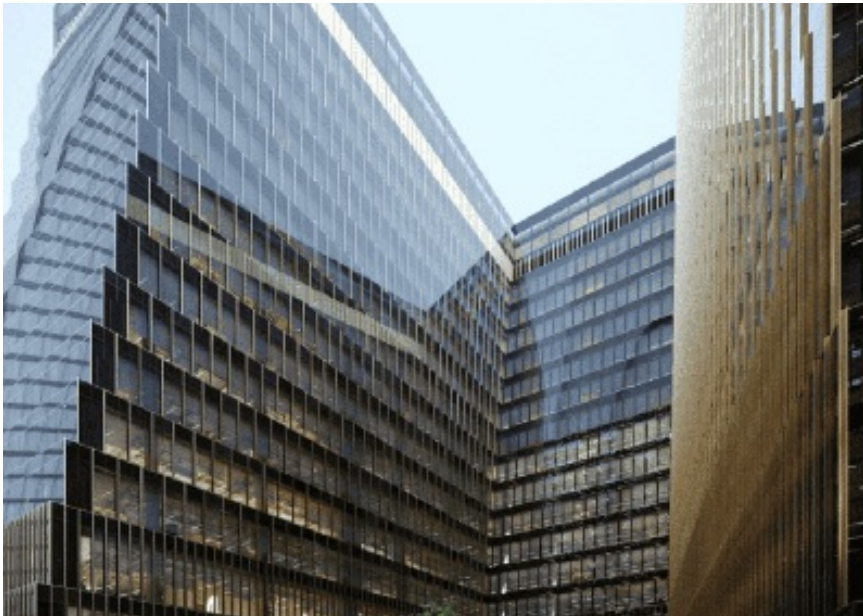

## Description

The multifunctional complex City-4. Block B is available for sale. The complex's exterior features a modern panoramic façade with an abundance of glass and elegant metal accents. The building facades are constructed of stained-glass windows (architectural glass) and adorned with decorative brass-plated slats, giving the structure a distinctive golden hue. The main façade, facing Krasnopresnenskaya Embankment, is particularly striking: its architecture is designed as a sloping, tiered composition.

The project places great emphasis on creating comfortable public spaces for residents and guests of the complex. A courtyard garden is planned between the two buildings, A and B, a private green area for outdoor recreation. The courtyard will be landscaped with walking paths, benches, hardscape elements, flower beds, and landscaping. Natural stone paving and large trees are planned to create a garden-like atmosphere in the heart of the business district.
